

Wisconsin Fast Plants

Wisconsin Fast Plants offers you an exciting new teaching tool with which to explore all the aspects of plant growth and development while introducing students to the process of scientific investigation. Your students' experience with fast plants will act as a tool to teach your students how to ask good questions and will demonstrate the steps to follow to find the answers to those questions. Fast Plants lend themselves easily to investigating those "what if" questions.¹

What you will need:

- A Fast Plants kit (seeds included), available through Carolina Biological
 - Suggested Kits Include:
 - Confetti Kit, Item #158692
 - Reading Green Kit, Item #158696
- A bank of Cool White fluorescent lights – a minimum of six bulbs is necessary for optimal plant growth, eight bulbs are ideal. You can also purchase light boxes from Carolina Biological
 - Suggested Light Boxes Include:
 - Plant Light House (It.#158994) and Bulb (It.#158996) or
 - Plant Lighting System, Item #158998
