

Biome Poster Project

Due Date:

Objective: Given the opportunity students will work in pairs of no more than <u>**TWO**</u> to create a unique poster presentation on a terrestrial or aquatic biome of their choice. Acceptable performance will include turning the finished project in by the due date, and including information on the description of characteristics; annual temperatures, seasons, precipitation, latitude, examples of plant and animals found commonly within that biome and a famous location.

Project Specifics: What your project needs to include.

* One Standard-sized poster (5)

FOR LAND BIOMES

- _____ Description of annual temperatures (may vary from month to month) (5)
- _____ Description of seasons (spring winter, wet dry) (5)
- Description of annual precipitation (may vary from month to month) (5)
- _____ Latitude at which biome is found (5)

FOR AQUATIC BIOMES

- ____ Type of water (5)
- _____ Description of different zones (5)
- Comparison of different bodies of water (5)
- Average temperature of water in bodies you described (5)
- * Examples of plants and animals commonly found in that biome (5)
- * Famous Locations (5)
 - Examples: Desert = Sahara

Tropical Rain Forest = Amazon

Deciduous Forest = Hoosier National Forest

- * Colorful pictures illustrating themes for the biome with captions! (5)
- * Neatness (5)
- * An appropriate title (5)
